EXPERIENCE

Spring – Full Service Studio   London, UK
Full Stack Developer   March 2022 – July 2022
- Worked alongside the lead designer to create a marketing website, showcasing all available services and past projects of the studio (Website built with React.js, TypeScript and Gatsby.js)
- Helped plan, develop and launch a native iOS application for a client in the mental health sector called "Drift" (Application built with MVVM architecture and Swift)

Crowdhaus – Property Discovery   London, UK
iOS Engineer   May 2021 – March 2022
- Assisted in the process of scaling the mobile application to 17,500+ downloads, 350+ five-star reviews on AppStore, and 7,500+ property enquiries while keeping the VIPER architecture
- Created a full-stack (MEVN) web application from scratch, accommodating users with no mobile app installed (15,000+ visits per month)

Junior iOS Developer   January 2021 – May 2021
- Designed some of the key features of an app such as authentication, filters, profile, groups and AppClips
- Worked closely with the CTO, CPO, and senior iOS Developer to improve and expand Crowdhaus iOS app

Marketing Intern   September 2021 – December 2021
- Provided suggestions on improving AppStore Optimization, Search Engine Optimization, and Social Media Accounts
- Produced visual and textual content for blog and newsletter with an audience of 1000+
- Worked closely with the CEO, Marketing Manager, and Growth Marketer to maintain user retention and increase metrics such as active users' numbers and app downloads

Card – Share Social Profiles   London, UK
Founder & Developer   July 2020 – November 2020
- Created an iOS application and a website from scratch, featured on the main pages of Product Hunt, BetaList, StartupBase, Founder Facts and various newsletters
- Reached 1,000+ downloads and 400+ active users within 5 months of managing the project. The project is sold!
